Meeting records 📄 Transcript

Summary

Kiyasha Singh updated Justin Germishuys on the Cyborg Habits website development, focusing on feedback regarding the "habits" section's alignment with behavioral tactics. Justin Germishuys emphasized aligning the language and imagery with the Cyborg Skills brand, prioritizing the core "habits" page for the upcoming demo while acknowledging other pages remain under development. Kiyasha Singh will prioritize the "habits" section for the demo, leaving other pages as placeholders.

Details

- **Cyborg Habits Website Development Update:** Kiyasha Singh presented their progress on the Cyborg Habits website ([00:00:00](#)) ([00:03:02](#)). Justin Germishuys provided feedback, emphasizing the importance of focusing on the "habits" aspect of the platform, aligning the language with behavioral tactics rather than skills or mental models ([00:01:03](#)). They agreed that the "habits" page was progressing well, despite needing adjustments to the color scheme and imagery to match the Cyborg Skills brand ([00:03:02](#)). Kiyasha Singh was advised to prioritize the core "habits" section for the upcoming demo, acknowledging that other pages are still under development and can be showcased as placeholders ([00:03:55](#)).

Suggested next steps

- ☐ Kiyasha Singh will adjust the language on the habit page to focus on behavioral tactics and habits, rather than mental models or skills, aligning with the "Cyborg Habits" branding.
- ☐ Kiyasha Singh will revise the homepage and tagline to better reflect the core message of "Cyborg Habits", focusing on habit development that improves AI performance.
- ☐ Kiyasha Singh will adjust the background color of the habit page to align with the Cyborg Skills brand.
- ☐ Kiyasha Singh will consider wireframing before diving into further development to clarify priorities and avoid confusion.

J & K - Transcript

00:00:00

Kiyasha Singh: Okay. All right. Um, I did work on this. I know you said that I shouldn't worry about it, but I did change it because I remember you saying that you don't like uh the container specifically. Can you click go? Okay. So, I just have this and then the complete challenge where you get a button here to flip back in case you missed it. And then I remember you saying what if someone wants to make a schedule or something. So let's say they are busy they can schedule a reflection question which will take them here and that's where we can input the mailing system but it also tells them that they must be done with a challenge reflection question on that same day and it tells them the

Justin Germishuys: Okay.

Kiyasha Singh: time frame where they should be. I don't know about this

Justin Germishuys: Okay.

Kiyasha Singh: but

Justin Germishuys: Look, I

Kiyasha Singh: yeah

Justin Germishuys: think that your thinking is is very very good here. The the self-scheduling is a good thing.

00:01:03

Justin Germishuys: Um, so there are a couple of things we we can go through it in more depth a little bit later. So the habit page is great. Your language is still leaning towards learning design. You're talking about mental models. We're not teaching people mental models, not directly. Um we're not really giving them a framework. We're not giving them skills. We're giving them behavioral tactics that turn into habits. That's it. There's nothing more to it than that. And we need to be very careful about creating the impression that we're building skills. We are but not directly. That's not the focus, right? Uh so yes, the program is called cyborg skills, but this particular um or the platform is called cyborg skills. This particular program is cyborg habits. So we do need to keep the language. So if you go back to the main page for instance

Kiyasha Singh: uh the homepage itself, the landing force skills.

Justin Germishuys: uh yeah also I think that brilliant minds outpace busy hands.

00:02:12

Justin Germishuys: I don't like that particularly. I don't think it really if whatever we say there needs to really capture the heart of cyborg skills and so for now I don't think that that does that. And then underneath develop the mental models and frameworks that truly enhance your thinking and decision- making. That's not what we're doing.

Kiyasha Singh: Okay.

Justin Germishuys: It's develop the habits that improve your performance with AI. Remember we did that thing together uh for Nolan? Like that statement was kind of

Kiyasha Singh: Oh.

Justin Germishuys: spot on. So you can kind of harness that. Um

Kiyasha Singh: Uh,

Justin Germishuys: All right.

Kiyasha Singh: actually,

Justin Germishuys: But

Kiyasha Singh: um,

Justin Germishuys: but

Kiyasha Singh: I'm

Justin Germishuys: we have to hop onto the demo day

Kiyasha Singh: okay.

Justin Germishuys: things.

Kiyasha Singh: Uh, I made an about us page and a simple contact page. I just

Justin Germishuys: Okay.

Kiyasha Singh: want to show you.

Justin Germishuys: Okay. Cool. Then we can be late like

Kiyasha Singh: Okay.

00:03:02

Justin Germishuys: a minute

Kiyasha Singh: Okay.

Justin Germishuys: or two.

Kiyasha Singh: I'm not

Justin Germishuys: Go

Kiyasha Singh: too

Justin Germishuys: for

Kiyasha Singh: sure

Justin Germishuys: it.

Kiyasha Singh: about what I'm supposed to have in the about us page. And I did I don't have a mission of the team. So I just put like

Justin Germishuys: Okay. You don't

Kiyasha Singh: Yeah.

Justin Germishuys: have to worry about this now. This is not central. What you do need to worry about is just making sure that the cyborg habits component is sorted.

Everything

Kiyasha Singh: Okay.

Justin Germishuys: else can come later. So, it's just a matter of priority. You've already got a really, really good front page for the habit with all of those tiles. And I think that the images are not 100% the right images, but they look good. That's closer to the look and feel that I'm looking for. I think the overall kind of grayish blue color that you have here is not aligned with, you know, the cyborg skills brand, but I do think that the habits part is coming along nicely.

00:03:55

Justin Germishuys: That's the only part I care about right now. Everything else can be under development, but if we can get that one piece right, we can always carve that one piece out and then use it while we're figuring out the rest. Okay?

Kiyasha Singh: Okay.

Justin Germishuys: So, you don't have to don't freak out. This is all part of the process. You don't have to build everything. There's the saying, don't try to boil the ocean. Take it one step at a time. Um, but also what we might need to do is just have you think about wireframing a little bit before you you dive into these things otherwise you get a little bit confused around like what's important, what's not. Uh, but for now I think it's definitely on the right track particularly the habits part. So, if we can just get like the background color right, then we can start demoing this part of it. At the very least,

Kiyasha Singh: Okay. So, um for today's demo, I should just show this page.

Justin Germishuys: you can show them whatever. Just say, "Look, this is what you've been working on." You don't have to hide things. You can just speak to them and say,

"Look, I've done this. My main focus has been the habit. So, these are basically placeholders for now." They are going to be changed within the next couple of days as I get more feedback. Also, you know, I've been unavailable. So I haven't been able to give you the best feedback in the world as you've gone along. It's okay. We'll

Kiyasha Singh: Okay.

Justin Germishuys: get there. Okay, cool.

Kiyasha Singh: Okay, thank

Justin Germishuys: Okay.

Kiyasha Singh: you.

Justin Germishuys: See you on the next call. Bye.

Kiyasha Singh: See, bye.
