Justin Germishuys, Kiyasha Singh

Transcript

Justin Germishuys: Hello. I'm right.

Kiyasha Singh: Hi, how are you? Okay. I just realized I sent you the wrong name.

Justin Germishuys: Okay,…

Kiyasha Singh: It's the one that you sent.

Justin Germishuys: Cuz I haven't actually been able to test. so let me quickly stride shift at dlab is it.com dlab?

Kiyasha Singh: Let me just see. AI.

Justin Germishuys: No, the dlab.

Kiyasha Singh: the one that I hosted

Justin Germishuys: No, don't worry. let me just quickly see what is the h just trying to figure out it's dlab.cosa. Okay no worries. I was just trying to figure out what the actual dlab thing is. sorry I just need to do all this silly stuff again.

Justin Germishuys: okay. So, it is DAB pin reach create user. cool. I just created a user. and so now I can sign in as that user. I just want to see something. I redeployed it. Sorry, where did I put it Cyborg habits. No, That's not it. Where did I put it? frustrating. there we go. I'm just going to sign in now. What is it that you want me to look at?

Justin Germishuys: because in all honesty it's quite a lot. So unless you're specific about something, it's very hard for me to do to know…

Justin Germishuys: what you might need. so I've gone in as strideshift dlab. I like what you did with the pre and post program. cuz then you moved that out of the shall Why isn't the fab icon working?

Kiyasha Singh: Yep. I forgot to switch off the leaderboard.

Justin Germishuys: I fixed it now. Hold on. wait,…

Kiyasha Singh: That's what I forgot in the DAB version.

Justin Germishuys:

Justin Germishuys: it's not a big deal. I mean, it's easy enough to do it. so I've changed that to fav icon. Let me just quickly see what happens when I do this. there it is working. So, let me redeploy it so that let me just quickly So launch I see sprint planner plan a one day design thinking sprint.

Justin Germishuys: Print I'm seeing the right Guided visual coach. Doo Story tester. Explain how to turn three daily problems I've noticed into possible business ideas. Start with the smallest test I can try for each.

00:05:00

Justin Germishuys: So, I'm still seeing that these challenges don't say insert something. Do you know what I mean?

Kiyasha Singh: Yes. yes.

Kiyasha Singh: I don't think I updated it based on that.

Justin Germishuys: Okay.

Kiyasha Singh: Okay. Yes.

Justin Germishuys: So, look how this is for pen reach and they start tomorrow. So, tomorrow they're just required to watch the video and do the survey.

Kiyasha Singh: Yes. Yes.

Justin Germishuys:

Justin Germishuys: So, you've got time. cuz the thing is that we're probably going to end up with a lot of pen reach stuff. In fact, I think that we need to do a general cyborg habits DB cleanup. So we need to kind of clone it at some point soon, clean it up and merge the things that we want to merge because I think that having custom challenge completions and…

Kiyasha Singh: Amen.

Justin Germishuys: custom challenge reflections, it just mudded muddies the water enormously. And that's why we had the problem last week because the logic for so if you it struggled to figure out where to write it if it couldn't resolve your challenge ID properly and so now there are two databases that need to inform all calculations and they're basically the same information.

Justin Germishuys: we just need to know which cohorts have had challenges overridden and then we can kind of trace back to what those challenges actually were but then the data should be fine you know what I mean because now in the database we're going to have some data with 17 or 15 days and some with 42

Justin Germishuys: And so I don't really know what the longer term implications are of doing something like this. Admittedly, we need to go back and just sit with AI and say in light of what we've got here, how would you redesign this database for more efficiency? And then maybe AI can tell us. That's why I'm not in too much of a rush, but we're going to have to do it as a matter of hygiene. so I know that I' got I've got a suggested video. I've got a planet. I've got a suggested task. I can click on it and I can click on it and complete. And I can say blue flower say share reflection. The reflection is saving. It seems to have saved. Okay.

Justin Germishuys: So now if I go into cyborg habits and I go down to database no authentication here's my unique ID okay and…

Kiyasha Singh: Yes. Home.

Justin Germishuys: it would be under custom hey so eventually everything's going to be under custom almost certainly. So, let's just quickly see customized challenge completions. Let's It shows that I've completed challenge number one and challenge number two. But does this mean that I've completed both?

Kiyasha Singh: Okay.

Justin Germishuys: No, it means I'll just Okay, I see how that works. Sorry, I'm just checking some stuff here. there we go. That's what I was looking for. Remove all filters. Okay, I see. Okay, that's fine. So, it's writing. let's see. User customize challenge reflections.

00:10:00

Justin Germishuys: Okay, I have to filter again. And it's writing the reflection to the database. So, all of that's working.

Kiyasha Singh: Okay. …

Justin Germishuys: It doesn't have to say insert.

Kiyasha Singh: then I'll get the challenges and then I'll just send you a few just so that you can see if it's following the correct format in terms of it saying insert. I will tell

Justin Germishuys: So, don't necessarily be too formulaic. I mean, it's the idea that matters. So then a simple self-reflection exercise I can do right now to find one strength and one area I could improve from my recent experiences. That's fine. You don't need anything more. so I think the trick is you need to actually do them and…

Justin Germishuys: see how AI be okay and…

Kiyasha Singh: and some of them.

Justin Germishuys: they worked.

Kiyasha Singh: Yes, I haven't done all 42. 40 because that's Yeah.

Justin Germishuys:

Justin Germishuys: It's a lot. Okay. let I plug it into chat GPT5. Let's see what it does. Here's a quick Okay, it worked even without additional context. All right. So, basically I have access to, Allison and Barbara's GoDaddy account.

Kiyasha Singh:

Justin Germishuys: But sometimes when I have to log in,…

Justin Germishuys: Barbara needs to send me an OTP. So Barbara gets the OTP for the login, but Allison gets the six-digit code for updating the DNS, which is very very annoying. So I never know, but it's super easy to do. it's All right, let me just quickly see. So if I've logged in as myself. It's interesting. Let me just see if the pre-program survey works. so yeah, that looks like it's all working nicely.

Justin Germishuys: No reason it shouldn't. So, I think you should probably just keep an eye on it. If it's like Penri Dlab, it's not the end of the world if they hit a glitch. It's not like a corporate client who's

suddenly going to stop paying us, So, I think that's fine. I think that what we can do past a point is clone the DB and keep only the stuff relevant to DAB in the clone…

Justin Germishuys: then take the anon key and stuff and then use that plug that into replet. So let me just quickly go and…

Kiyasha Singh: Okay. …

Justin Germishuys: redeploy and hopefully the fab icon updates as well. Okay, it's deploying. Okay, so let's give this another bash. yep. Okay, the fab icon's working good.

Kiyasha Singh: can I ask you to please look at the leaderboard? I changed the layout. Maybe that's a bit more suited. We're not going to use it, but yeah,…

Justin Germishuys: So the problem is it's like taking up an enormous amount of space…

Kiyasha Singh: in the DAB version.

Justin Germishuys: unless it's not rendering as you intended. But let me kind of go with what's generally Can you see it now?

Kiyasha Singh: Yeah. Yeah.

Justin Germishuys: So this is what you're going so I mean this isn't really consistent with anything else that's gold and there's a little crown over there which is not at all the iconography.

Kiyasha Singh: Yeah. …

Justin Germishuys: These things take up an enormous amount of space. But if you have how many people in the pen reach cohort?

Kiyasha Singh: there's 20. But I was under the impression that the leaderboard is only supposed to show the top three. Oh.

Justin Germishuys: No. my leaderboard shows everybody. It just ranks them. So my leaderboard Yeah. I mean people want to know…

Justin Germishuys: if they're number 13 in the rankings. Otherwise, all that's going to happen is they're ever going to see the top three everybody else is going to feel what's the point and then disengage from the leaderboard entirely. So, yeah,…

00:15:00

Kiyasha Singh: What…

Kiyasha Singh: if it's the top three and then with they rank Okay.

Justin Germishuys: so a lot of people are going to rank the same. So the logic for the leaderboard I have is that if you have two people who have completed the same amount and that puts them in position five, then they're all tied at position five because they're all at the same otherwise it becomes random who's five, who's six, who's seven because they've all done exactly the same amount. So the logic I have is that it's not like you have a position out of 20.

Justin Germishuys: if everybody had done a different amount, you'll have 20 positions. kind of. But ultimately, it doesn't like I've said this many times, I think the leaderboard is stupid. I don't want it. So, I

don't care about it. But if we are going to have one, it just can't be this for now. So, I think just stick with my leaderboard. I mean, don't change it…

Kiyasha Singh: Okay.

Kiyasha Singh: I'll leave it as that.

Justin Germishuys: unless you really want to. I mean you want your one or mine?

Kiyasha Singh: No, the only thing that I wanted to implement was just when you an admin you if you have different cohorts under you, you can navigate because that's what B and the feedback that I got that time. No, so they're only stuck seeing the code that they in.

Kiyasha Singh: So So also if you see it from a super admin's perspective, you don't really navigate to the others.

Justin Germishuys: mine. …

Kiyasha Singh: I'm under the impression that that was yours. I can't remember how yours looked because I've changed it so much.

Justin Germishuys: let me see. So, if you're not a super All right.

Kiyasha Singh: Super admin and Apple Yeah,…

Justin Germishuys: So, let me just quickly take this out of the I want to delete this one.

Kiyasha Singh: I can see.

Justin Germishuys: Is. No, It's not deleting. Why is it not deleting? Or is it just not updating the view?

Kiyasha Singh: What's not deleting the users?

Justin Germishuys: No. It deleted. it just didn't update the view. So, that's something that needs to be fixed. All right. So, let's see who Okay, I'm obviously in this as well, so I may as well just change myself.

Justin Germishuys: Okay, here we go. So, I'm participating in and I'm managing all cohorts. So, when I go to the cohort view, you say, or manage cohorts.

Kiyasha Singh: No.

Kiyasha Singh: When you go to leaderboard, that's the feedback on the leaderboard.

Justin Germishuys: I then simply have a drop down where you can shift leaderboards. It's one. We're on the same page. I think then the PenRache thing is working. I created a PenRache user.

Kiyasha Singh: Okay. Okay.

Justin Germishuys: I logged in. I saw the right challenges. I completed them. I shared a reflection. It updated. I think it's fine. Unless you want to test it some more, but it is live on cool. is that all that we needed to do or…

Kiyasha Singh: Yes, that's it.

Justin Germishuys: Okay. I'm glad your lights are back on.

Kiyasha Singh: Thank Me, too. It's very annoying, but thank you.

Justin Germishuys: Yeah. Why does it keep happening? Is there something you can do about it?

Kiyasha Singh: So I don't know. It's the way they set up the electrical thingies in this complex. So, when there's a lot of people that have a specific appliance on too many appliances on, it trips and…

Kiyasha Singh: then we stuck without lights. And then the building owner has to rush over here try to fix it. So today he had a technician rewiring so to fix it properly hopefully.

Justin Germishuys: to fix it properly or…

Justin Germishuys: just to get it back on temporarily. I hope for your sake that that is the case.

Kiyasha Singh: Me too.

Justin Germishuys: All Have a good day, Kesha. I'll speak to you soon.

Kiyasha Singh: think. Bye-bye.

Justin Germishuys: Okay. Bye-bye.

Meeting ended after 00:19:37 👋
